

Product Name - In Vehicle Docking Station for T101
Part Number – A101

The TETRA**tab** docking station provides the tablet PC with Ethernet, VGA, USB and power connections, and has an antenna connection for an external antenna. Multiple mounting options for the docking head make this a highly versatile docking solution. A number of options are available for remote monitors, and keyboards (wired and wireless). The design approach allows for bespoke installations, from stand alone dashboard mounted operation, to entirely concealed/covert when used in conjunction with a visor mounted screen.
